

Andreas Walbrodt

Technology & Interim Management

PROJECT

Implementation of a Cyber Security Operations Centre.

Oil and gas company in Hesse and Hamburg, 3,500 employees.

MAIN FOCUS

Cyber Security Operations (MDR)

INDUSTRY

Energy

TIME FRAME

9 month

DIRECT TEAM

7

STARTING POINT

The company resulted from a merger between two oil and gas companies. The security standards and visibility of risks and threats (e.g., cyber-attacks) had to be greatly increased, in order to avert future damage and dangers. The new company decided to put all digital services and platforms out to tender at the same time and to award them to different service providers.

ROLE & TASKS

Project Manager on behalf of the Executive Board and the Chief Information Security Officer (CISO):

- Design of a structured process flow
- Preparation of process analyses and creation of process documents
- Integration of the processes with all selected service providers
- Implementation of the service levels (SLAs) in operation, consumption measurement and reporting
- Setting up the necessary systems in the environments of the other service providers
- Integration of the data into the infrastructure of the Security Operation Centre (SOCs)

RESULTS

- Handover of the CTB project to the RTB team within the agreed timeframe
- Adaptation of the initial solution to integrate the Microsoft Cloud
- Ensuring process consistency across provider boundaries
