

Andreas Walbrodt

Technology & Interim Management

PROJECT

Transforming the global perimeter protection environment.

Automotive supplier in Bavaria, 10.000 employees.

MAIN FOCUS

Cloud, Security

INDUSTRY

Automotive

TIME FRAME

8 month

DIRECT TEAM

3

STARTING POINT

The company had migrated important internal applications to cloud platforms worldwide and therefore had to adapt the security architecture of its network security to the newly created "digital boundary".

ROLE & TASKS

Project Manager on behalf of the CIO:

- Set-up of the worldwide infrastructure accounting for the necessary international regulations (e.g. China, Brazil)
- Development of test and acceptance concepts
- Creation and validation of the relevant documentation
- Operational handover of the individual systems

RESULTS

- Delivery and transition on schedule
- Improvement of the performance of the target platform through direct access
- Ensuring global perimeter security consistency across boundaries
